Mike:

Just an FYI - I am not going to be able to be at the CFAC kickoff meeting on Tuesday (4/5) between 9 and noon – due to a previously scheduled meeting from 10-12 for the DEQ program I mainly work for. I am hoping that you or Damon could let me know whether it would be valuable for me to come up in the afternoon that day. I plan to attend the public meeting in the evening. I should be available at other times during the week next week - and depending on what is happening, may come up. I will give you or Damon a call around noon on Tuesday and see how things are looking for the afternoon.

Thanks – and see you next week.

Hi Tom,

Included below is Robert's message to the community of C Falls. The main message I will be trying to get across is the difference between Calbag and our investigation. I think it's important the community knows we will not be performing cleanup until we know what's there

My office email isn't working so you'll have to live with my iPhone responses at this time.

Have a good day.

Mike

Subject: EPA public meeting RE: CFAC - Tue. Apr. 5 @ 6 p.m. Columbia Falls MT

Dear Interested Stakeholder,

The U.S. Environmental Protection Agency (EPA) will host a public meeting to update people about the Columbia Falls Aluminum Company (CFAC) Plant proposed Superfund site.

What: EPA update on CFAC, Public Q & A

When: Tuesday, April 5, 2016 from 6 – 8 p.m.

**Where: City Council Chambers, City Hall, 130 6th St West, Columbia Falls
Montana 59912.**

In November 2015, EPA signed an Administrative Settlement Agreement and Order on Consent with CFAC to conduct a Remedial Investigation/Feasibility Study to determine the nature and extent of contamination at the site and look at potential cleanup options. That investigation is underway.

EPA is planning to make a determination on whether to list the site under the Superfund cleanup process this fall. Public engagement is critical so that people understand the Superfund process and the ongoing status of the CFAC site and have the opportunity to provide information to the EPA to ensure decisions about the site reflect all of the best information available.

Please share this information with others. EPA encourages anyone with interest to attend the meeting. Contact me with any questions. Thank you.
